**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 17-20 are finally rejected under 35 U.S.C. 102(b) as being clearly anticipated by Lamb 5,102,487. Note especially figure 1, cutters **18**, **30** sensor **46**, and column 4, lines 52-64.

### *Response to Arguments*

3. Applicant's arguments filed October 27, 2003 have been fully considered but they are not persuasive. Applicant argues that '487 does not disclose or suggest an apparatus for simultaneously cutting end cuts through multiple stacked webs with a cutter to simultaneously produce separate roofing shingles from the webs. The examiner disagrees. '487 discloses cutting web 14 into separate webs 20 and 22, stacking webs 20 and 22, and simultaneously cutting end cuts through them to simultaneously produce separate roofing shingles.. Applicant argues that each of the webs does not have distinct portions as now claimed. Applicant should note that the claims presented November 17, 2003, in response to the Notice of Non-compliance mailed November 6, 2003, does not provide this limitation. Further, the webs do have distinct portions, in that both have distinct cutouts. Note that the apparatus stacks the webs prior to cutting at 30. Note column 4, lines 30-37 for a discussion of multiple web

feeders. Note column 4, lines 52-64 for a discussion of the controller, which meets applicant's claimed limitation. It is suggested that applicant amend the claims to reflect the invention disclosed at page 6, lines 18 through page 7, lines 15, including the apparatus for stacking webs of laminated, tabbed shingle material and cutting through the stacked webs of laminated, tabbed shingle material. While such limitations would overcome the rejection based on '487, they may include new issues, and not be entered. As currently broadly claimed, '487 meets the presented limitations.

***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
